

# Feature Showcase

Every inline decoration: **strong**, *emphasis*, underline, ~~strike~~through, highlighted text, and ***bold italic***. A [link](#) with a footnote.<sup>1</sup>

Superscript<sup>note</sup> and subscript<sub>index</sub> both render as decorations.

An image resolves relative to the `.crv` file, via the injected `<base href>` :

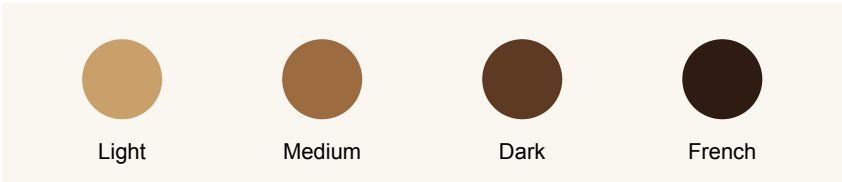

Figure 1: the four roast stages, lightest to darkest

## Table with row and column spans

| Region | Q1 | Q2 | Q3 |
|--------|----|----|----|
| EMEA   | 12 | 15 | 19 |
| APAC   | 8  | 11 | 22 |
|        | 20 |    | 25 |

The `^` in the last row extends the “APAC” cell down two rows; the `<` merges into the cell on its left.

## Critic markup

The quick brown fox ~~lazy~~ jumps over the ~~dog~~log.

## Admonition

**Note**

This is an admonition block - rendered as a tinted container.

*Plain text should render beautifully and stay readable at the source.*

Design principle

1. Inline footnote content, rendered as an endnote.↩
